***Please join us in creating our 2024 Water Calendar***  
***This year's theme:***  
***“Saving Water is Easy!”***

With the abundant rainfall we have in the Pacific Northwest, it is sometimes difficult to understand why we need to conserve water. As our communities have grown, our water needs have also grown. Water conservation is something that we should all practice. Not only is water conservation the smart thing to do, it's the right thing to do!

**For our 2024 Calendar we are asking students to create pictures that show what they can do to save water at home and at school.** To help students learn more about how they can save their drinking water, see the links below.

**Source to the Tap** video. Learn how much of all the water on our planet is available for drinking water, and why it is so important that we all conserve our drinking water and always use it wisely, <https://vimeo.com/532046652> .
